果萌優 350

BLOOMING AND FRUIT SET

- Promote flower bud differentiation
- Increase the numbers of flower buds
- Vigorous flowering
- Young fruits are expansion rapidly
- Flower and fruit drop is less likely
- Enhance fruits quality

Active ingredients

Total nitrogen	4.0 %
(with ammonium nitrogen)	2.5 %
(with nitrate nitrogen)	1.5 %
Water-soluble phosphoric anhydride	15.0 %
Water-soluble potassium oxide	4.0 %
Water-soluble calcium oxide	4.0 %
Water-soluble magnesium oxide	3.0 %
Water-soluble manganese	0.50 %
Water-soluble boron	0.50 %
Water-soluble molybdenum	0.020 %
Total Zinc	0.30 %

Method of Use

Fruit trees (from the period of new leaf growth to young fruit stage),
fruit-bearing flowering crops (throughout their growth stages)

1. Diluted 1000 times for spraying leaves; or 500 times for root watering.

Use every 15 to 20 days, the used amount can be adjusted according to the
weather, soil moisture, and plant growth status.

**Do not use this product in sunlight and high temperature environment; avoid
transpiration effects to affect plant growth.

**When spraying the leaves, be sure to dilute the solution according to the specified
dilution ratio to prevent fertilizer burns on leaves.

Cautions

*This product contains Boron (Br) and Molybdenum (Mo) and Zinc (Zn), and excessive
use may cause toxicity and soil pollution. Please dilute to a safe concentration according
to the dilution instruction. Do not spray on edible parts one week before harvesting.

*Please apply fertilizer according to the recommended method and usage amount.

*Shake well before use.

*Keep in a cool and dry place away from direct sunlight.

*When this product is mixed with other materials, perform a small-scale test first.
