Method of Use

Any type of fruit trees or fruit-bearing flowering crops.
(Post Enlargement stage)

1. Post Enlargement stage: diluted 1000 times for spraying leaves; or 500 times for root watering; use every 15~30 days until harvest. The used amount can be adjusted according to the weather, soil moisture, and plant growth status.
2. It can alternate use by spraying or watering of "Go Beauty 380", to enhance the color and flavor.

****Do not use this product in sunlight and high temperature environment; avoid transpiration effects to affect plant growth.**

****When spraying the leaves, be sure to dilute the solution according to the specified dilution ratio to prevent fertilizer burns on leaves.**

Cautions

*This product contains Boron (Br) and Molybdenum (Mo), and excessive use may cause toxicity and soil pollution. Please dilute to a safe concentration according to the dilution instruction.

Do not spray on edible parts one week before harvesting.

*Please apply fertilizer according to the recommended method and usage amount.

*Shake well before use.

*Keep in a cool and dry place away from direct sunlight.

*When this product is mixed with other materials, perform a small-scale test first.
