

Wound Caring Expert!

BluRibbon

Say No To Wound, Best Caring Solution.

BluRibbon is primary dressing for acute or chronic wound especially cavity wound produced by Dual Nano Technology. It is made from Nanobiocellulose coated with Blue Silver Nanoplates. Nanobiocellulose can apply to dry necrotic tissue to promote autolytic debridement and also provide moist wound environment to speed up tissue granulation.

BluRibbon can easily be inserted into the wound cavity with gentle touch to wound bed and allows easy and painless removal with no residue left in wound cavity.

Our Innovation

The diagram illustrates the components of BluRibbon's innovation. On the left, there is a photograph of rice plants labeled 'Oryza sativa L.' and a microscopic view of blue, rod-shaped bacteria labeled 'Acetobacter Xylinum'. In the center, a scanning electron micrograph (SEM) shows a porous, fibrous network labeled 'Nano Biocellulose Technology'. A large blue plus sign is positioned between the Nano Biocellulose and the Blue Silver Nanoplates. On the right, there is a photograph of grey, plate-like structures labeled 'Blue Silver Nanoplates'. Below the nanoplates, there is a color calibration strip and a series of small images showing the application of the dressing to a wound. At the bottom right, there is a graph showing multiple curves, likely representing the performance of the dressing.

Biocellulose Anti-microbial Dressing With Blue Silver Nanoplates

- Maintains moist wound environment.
- Helps the wound cleaned with its autolytic debridement.
- Prevent infection with Blue Silver Nanoplates.
- Natural blue color as self indicator for its effective antimicrobial activity of Blue Silver Nanoplates.
- Easy to insert into narrow and deep wound cavity with gentle touch to wound bed.
- Effectively soften callous wound naturally.
- Allows easy and painless removal with no wound residue left.

Case Study : - Female 70 years
 - Diabetic Mellitus for 10 years
 - Chronic cavity wound at left heel

- Initial lesion 3.2 x 4 x 3.5cm
 - Lesion presents for 2 months
 - Previous dressing : wet dressing

Code	Description	Packing	Code	Description	Packing
BR120	BluRibbon 1 cm x 20 cm	20 Pcs. / Box	BR305	BluRibbon 3 cm x 5 cm	20 Pcs. / Box
BR225	BluRibbon 2 cm x 25 cm	20 Pcs. / Box	BR1010	BluRibbon 10 cm x 10 cm	10 Pcs. / Box

Blue Silver Nanoplates

- The natural Blue-colored silver wound dressing.
- Color change when Ag⁺ releases can be observed as self-indicator for its action.
- Minimal silver content with effective efficacy.
- Possesses most properties ideal wound dressing.
