

SCARFREE SILICONE GEL SHEET

+ FOR RED AND RAISED SCARS
+ FOR NEW KELOID AND HYPERTROPHIC SCARS

- + Clinically Proven
- + Flattens, Softens and Fades Scars
- + Washable and Reusable

+ INTRODUCTIONS

- SCARFREE is a thin, soft and comfortable adhesive gel sheet made from medical grade silicone. It is durable, each piece can last on average of 7 to 14 days, up to 30 days.
- **It improves the appearance of red and raised scars and effectively inhibits scar formation.**

+ FEATURES

- Clinical tests proven the effectiveness of scar reductions.
- Reusable. (Up to 15 times after proper wash by neutral detergents.)
- Less friction: Three times thinner than other brands and better texture w/PU film makes SCAR-FREE stay put.
- Transparent: Easy for scar observation.
- Easy to apply.
- With gentle pressure, it enhances the scar reduction.

+ APPLICATIONS ON CLINICAL CASE
